

AI Technical Due Diligence

**De-Risk Your AI Investments.
Gain Unmatched Technical Clarity.**

You are evaluating a potential investment in an AI-driven company or have already invested in one. The pitch was compelling and the team is impressive, but the core of the business is a black box. How do you truly know if their technology is defensible, scalable, and built on a solid foundation? Our AI Investment Technical Due Diligence service provides the objective, expert analysis you need to make informed decisions. We go beyond the pitch deck to validate the technical claims, assess the team's capabilities, and uncover potential risks.

How We Deliver

We are not just generalists, we are a team of hands-on AI practitioners. We understand the nuances of building and scaling AI systems because we've done it. Our deep, specialized focus means we can ask the right questions and spot red flags that others might miss, giving you a crucial competitive edge. Our process is a concentrated sprint of 2 weeks, that delivers a comprehensive technical assessment.

AI Consulting for VC/PE

Suitable For:

Venture Capital and Private Equity firms looking to:

- Make an investment in a company with AI or Machine Learning as its core technology.
- Have an independent, expert opinion to validate the technical claims made by the target company.
- Move quickly but require a clear, actionable analysis within a tight deadline.

Kick-off & Discovery	Technical Deep Dives	Findings & Recommendations
Identify Stakeholders & Scope	Multi-faceted Technical Analysis	Current State & Actionable reports
We work with your deal team to understand the investment thesis and specific technical questions you need answered. We'll set up a technical interview schedule with the target company's key personnel.	• Architecture & Code Review • Talent Assessment • Data Strategy Audit • IP & Defensibility Review	We provide a clear, concise report that translates complex technical findings into actionable insights for your investment committee. We'll highlight the key strengths, weaknesses, opportunities, and threats.
Day 1	Days 2-7	Days 8-10

What you get

- **Due Diligence Technical Report:** A detailed document covering our findings on technology, data, talent, and defensibility.
- **Risk-Opportunity Matrix:** A clear summary of the technical risks and opportunities associated with the investment.
- **Executive Summary:** A concise, easy-to-read memo for your investment committee that presents the bottom line and our final recommendation.
- **Post-Engagement Q&A:** A dedicated session to walk your team through our findings and answer any follow-up questions.
