

AI Acceleration for Portfolio

**Activate Hidden AI Value in Your Portfolio.
Drive Growth, Not Just Hype.**

You invest in great teams, but the rapid pace of AI adoption demands specialized execution. Our AI Portfolio Acceleration service is designed to quickly inject a coherent AI strategy and technical capability into your portfolio companies. We move beyond high-level advice to provide hands-on execution across the three pillars of AI success: Strategy, Execution, and Talent. Our goal is to de-risk AI initiatives, prove value fast, and build long-term internal capability.

How We Deliver

We are a boutique consultancy dedicated exclusively to AI. We operate with the speed and flexibility required by growth-stage companies, translating technical complexity into clear business outcomes for both the portfolio company and the VC. We provide a modular, results-focused approach leveraging our deep expertise as hands-on AI practitioners. We rapidly assess the opportunity and then embed the necessary support.

AI Consulting for VC/PE

Suitable For:

Venture Capital and Private Equity firms looking to:

- Standardize and accelerate AI adoption across a segment of their tech portfolio.
- Invest in a company that has strong tech talent but lacks specialized AI strategy or LLM expertise.
- De-risk a portfolio company that is struggling to move an AI project from R&D to production.

AI Strategy Workshop	MVP Development Support	Team Upskilling
Identify High-Impact Opportunities	Prove Value Fast	Build Internal Defensibility
An intense two day workshop with executive and product teams to pinpoint two to three of the most valuable, achievable AI use cases (beyond the obvious) and create a 6-month roadmap.	We partner with the portfolio company's engineering team to design, build, and deploy a Minimum Viable Product (MVP) or prototype for a prioritized AI use case, ensuring technical feasibility and rapid market feedback.	Custom, hands-on training for the portfolio company's engineers and data scientists on specific modern AI tools, LLMs, and best practices, transforming existing talent into AI-ready experts.
Fixed scope (2-day engagement)	Fixed-Duration Project (Typically 4-8 Weeks)	Flexible/Rolling (Monthly retainer or T&M)

What you get

- **Prioritized AI Roadmap:** A structured, 6-month plan outlining specific AI projects, required resources, and predicted business impact (from the Strategy Workshop).
- **Working AI Prototype:** A functional, deployed MVP/prototype proving the core hypothesis of a high-value use case (from MVP Support).
- **Competency Scorecard:** A measurable uplift in the portfolio company's internal technical understanding and confidence in executing future AI projects (from Team Upskilling).
- **VC-Focused Report:** A concise summary of progress and next steps, optimized for quarterly or annual portfolio review presentations.
