

AI Leader Launchpad

Your First 90 Days Are Critical. We Ensure Rapid Impact and Unshakeable Credibility.

Stepping into a new Head of AI or VP position is a high stakes undertaking. Your mandate is clearly defined: deliver tangible value, construct a high performing team, and strategically influence the company's future.

The **New AI Leader Launchpad** is a structured, hands-on advisory service explicitly designed to de-risk and accelerate your first three months.

We eliminate ambiguity, helping you establish a coherent vision, secure critical early wins, and achieve immediate alignment with key stakeholders.

How We Deliver

We are a team of AI practitioners who have executed at the leadership level. We don't just provide frameworks, we provide specific, actionable content and guidance tailored to the reality of deploying AI in complex organizations, ensuring you look prepared and confident from Day One.

We deliver a concise, high-impact engagement, typically spanning 4-6 weeks, built around three core modules that ensure you hit the ground running.

Module	Focus	Delivery Details
90-Day Plan Formulation	Strategic Blueprint & Prioritization	We structure working sessions to analyze your inherited assets, identify organizational gaps, and collaboratively create a granular, strategic plan for the next three months, complete with defined success metrics.
'Quick Win' Identification	Early Credibility & Value Proof	We analyze existing data and infrastructure to pinpoint a small, technically feasible, high-visibility project that can be launched quickly (within the 90-day window) to demonstrate immediate value to the C-suite and the wider organization.
Stakeholder Alignment	Securing Executive Buy-In	We coach you on framing the AI vision for different audiences (Executive, Product, Engineering) and help craft the presentation materials needed to secure budget, resources, and cross-functional support for your 90-day and 1-year roadmap.

What you get

- **Formalized 90-Day Strategic Plan:** A detailed, living document with prioritized initiatives, milestones, and defined KPIs.
- **'Quick Win' Project Charter:** A ready-to-execute document outlining the scope, resource requirements, and measurable expected return on the initial high-impact project.
- **Executive Communication Deck:** A professionally structured presentation that clearly articulates your AI vision, immediate plan, and resource ask, ready for C-suite review.

AI Consulting

Suitable For:

- **Newly Hired Leaders:** Individuals who have just accepted a Head of AI, VP of Data, or Chief Digital Officer position.
- **Existing Leaders with a New Mandate:** Moving into a new internal role tasked with scaling the company's AI efforts.
- **Program Leaders on an AI project with Executive Visibility.**
