

White-Label AI Service Partner

Instantly Launch Your AI Practice.
Zero Overhead, Pure Expertise.

The demand for AI strategy and implementation is skyrocketing, but building an in-house team of specialized AI engineers is costly, slow, and risky. Our **White-Label AI Service Partner** offering is designed to solve this.

We seamlessly integrate with your consultancy, becoming your specialized, full-stack AI technical team. This allows you to immediately **expand your service catalog, capture new revenue, and deliver high-demand AI solutions to your existing clients**, all under your brand and without any internal investment.

How We Deliver

We offer a flexible partnership designed to maximize your credibility and minimize your risk. We focus strictly on the technical execution, protecting your client relationship at all times and we deliver engagements by following rigorous program management best practices and methods.

As a boutique firm, we do not compete with you on general consulting, strategy, or account management. Our sole focus is delivering specialized AI outcomes, ensuring your clients are delighted and your reputation for innovation is secured.

White-Label AI Partner

Suitable For:

Boutique and Mid-Sized Consultancies that:

- Possess strong client relationships but lack In-House AI Specialists.
- Have identified a market gap in specialized AI, Machine Learning, or LLM engineering.
- Are seeking immediate scale, offering AI services without the 12-18 month lead time required to hire and train AI talent.

Partnership Model	Focus	Benefit for Your Team
Project-Based Partnership	Technical Delivery	We execute the AI scope (e.g., model development, data engineering, LLM implementation) as your internal team. We work under your brand, attending client meetings only when necessary to discuss technical implementation.
Joint Client Pitching	Pre-Sales Technical Authority	We collaborate with your sales and account teams to structure and present complex AI solutions to prospective clients. We provide the credible technical voice that wins the deal, then hand the client relationship back to you.

What you achieve

- **Expanded Service Catalog:** The immediate ability to market and sell services like 'AI Solution Validation', 'AI Roadmap Development' and 'AI Strategy Implementation.'
- **Enhanced Pitch Success:** Improved win rates on proposals that require deep technical AI knowledge, supported by our expertise in pre-sales conversations.
- **Increased Revenue & Retention:** New revenue streams from AI projects and stronger client retention due to your ability to meet complex, specialized needs.
- **Successful Client AI Project Delivery:** Measurable, high-quality technical deliverables for your client projects.
